Kritika Singh

Product Designer

Dublin, Ireland (open to relocation) | singhkritika832@gmail.com | Portfolio | LinkedIn | GitHub

PROFILE

Product designer with 6+ years shaping digital products from early exploration to launch across web and mobile, in AI-powered collaboration, fintech and B2B. I design how AI features behave and show up for people, prototype ideas in working code with Claude Code and Cursor, and build my own agentic tools with the Claude API. Computer Science background, so I work closely and comfortably with developers.

EXPERIENCE

Gravitad | Lead UX Designer — Oct 2024 – Feb 2026 | Remote

- Defined the interaction model for three AI features on an audiovisual collaboration platform — Intelligent Asset Tagging, Version Comparison and Automated Review Routing — deciding what the AI suggests, when it asks people to confirm, and what it hands back.
- Designed how people review, correct and approve AI-generated results, making non-deterministic behaviour transparent enough that people actually trusted it.
- Built a working coded prototype of the platform by guiding Claude and Cursor, testing ideas quickly with engineers before committing to build.
- Ran 12 interviews across two production studios and found the real problem was access, not review quality — a finding that reframed the platform's direction.
- Iterated through four rounds of usability testing until editing cycles were 65% faster and task completion reached 92%.

Hazedawn Limited | Product Designer — Aug 2022 – Sep 2023 | Remote

- As sole designer, took a native mobile B2B issue-reporting app from zero to launch for three user roles, working with frontend and backend developers and QA through to adoption on live construction projects.
- Prototyped on site in real light and working conditions to shape a 3-step flow completable in under 60 seconds: 40% less time to report an issue and 30% more follow-ups completed.
- Maintained and grew the reusable component library alongside the product, and mentored a junior designer.

Sparklin Innovation | UX Designer — Jan 2022 – Jul 2022 | Remote

- Redesigned login and onboarding for ICICI Bank's 79M+ customers across web and mobile within regulatory constraints; completion rose from 60% to 82% and time to complete fell 25%.
- Built a design system from scratch — token architecture, 80+ components and documentation adopted by other engineering teams — held to WCAG 2.1 AA.

Wipro Technologies | UI/UX Designer — Cigna Healthcare — Jan 2019 – Dec 2021 | Chennai, India

- Redesigned data-heavy member portals — claims, benefits, provider search — for a US health insurer, and produced interaction specs used directly by onshore and offshore engineering teams.

AI PROJECTS — DESIGNED AND BUILT WITH THE CLAUDE API

Job Tracking & Job Monitor Agents — Agentic tools that track and monitor a job search end to end; I designed how each agent breaks down the task, what it checks, and when it hands back to me, then built and deployed them myself.

Content Generation Agent — Generates content for @archivingpresence, an Instagram account curating interactive contemporary art, with tone and output shaped through prompt and behaviour design.

SKILLS

Product Design: End-to-end product design, problem framing, user flows, interaction design, rapid prototyping
Interface & Systems: Multi-platform UI (web, iOS, Android), design systems, components, micro-interactions, WCAG 2.1 AA
AI: Agentic UX, AI behaviour & trust design, Claude API, Claude Code, Cursor, Figma AI
Tools & Code: Figma, FigJam, Maze, Dovetail, HTML/CSS/JS
Research: Interviews, contextual inquiry, field shadowing, usability testing, synthesis

EDUCATION

MSc Interaction & Experience Design | University of Limerick — 2023 – 2024

B.Tech Computer Science Engineering | SRM University — 2015 – 2019
